

Mary: STORIE Page-1

Sept. 2-2021

Monday - 10 PM

Suddenly being disturbed out of my sleep
not knowing what is this? - a grating & incredible
stabbing pain over came me. ~ If I had known
I could have prepared myself - in some ways
from this unexpected invader.

Thanks to my son Tom & Katherine. When in my despair
calling them out of their night rest at 1 AM Tuesday
Rushing me over to Dominican Hospital Emergency
that was instant action - All hands on deck there.

I was half in half out, from the drugs given me
On to the M-R-T. Ct scan - another, another half dozen

1 test done. Being not able to think straight feeling Ok
(from all the drugs) sinusitis in the check in area with me.
And the testing done, I said it looks like I can go home
now?! But instead I was wheeled to a room in the hospital.
The prognosis of the testing is that a fragment of a large
gallstone on its way out But instead was stuck in the
bile duct at the sphincter-junction - with the duodenum
causing inflammation. Surgery was planned.

Panic at Home

Marion hearing the news - flew in from Idaho. There ~~was~~ drove 3 hours
from ~~Idaho~~ Katsims R.W. city, Katherine & Tom here at home
Sutter Creek

Being together, planning what can we do?
 they all believe in praying, so therefore let us
 set up a prayer chain

to our Father who is in Heaven

From our family, friends, Father Roy, all over the
 country to pray for their mam to have a
 successful surgery, to have the gall stone removed
 the next day was planned by the surgeon's to
 operate

Our Father in Heaven - hearing all those prayers
 for mam - saying this gall stone
 is to be Evicted immediately

before
 today's surgeon Dr. Ghosemmi performed a
 non invasive - procedure of a smaller area near the
 stone and doctor Schepps, came in to observe,
 they did not see the stone in the bile duct - and thought
 the stone had past - the area of the sphincter was
 still irritated, which indicated it was there before
 also a imprint where the stone had settled before
 the surgeon & Dr Schepps, were at a loss and frustrated
 this has never happened before, he said later to me

when coming into my room
gave me that mysterious look
I will never forget that look in his eyes
He said this is not a mystery may
softly spoken he whispered this is a miracle
In all my frustration I said
Really Doctor - Really, Now what?
Well he said. No stone - No surgery
you may go home tomorrow
your gallbladder is in a very good state
and not to be removed, you may do what
you like to do as before, not to change your diet.
You are in perfect good health
in order for a observation of digestion.
Before I leave, I should have 2 full meals
this was dinner that night - Breakfast in the morning
all checked out - OK and normal. And by noon
I was in the wheel chair, and Theresa to take me home

now all being together discussing this mystery
We believe that it was

Our Father who is in Heaven
had Evicted The Gallstone from my body
and we all agreed that the
Surgeons Dr. Guasemmi + Dr. Schepps
discovered the missing stone to be a Miracle
Sinds this had never happened to them before

Therefore we are all thankful to our Father in Heaven
for having our Mom back - Healthy and well

I too gave my great full Thanks

and my thanks - to Marien, Katina, Theresa,
Katherine + Tom
for their care.

and to all who did pray - for me
on the prayer @ Rain
Love to all

from Mary Van Diepen
